TP-163	Shared repeater tone panel	\$290.00
TP-154	Shared repeater tone panel	\$311.00
CS-900	Control station interconnect	\$342.00
CD-2	Decoder	\$207.00

The TP-163 converts any receiver and transmitter into a powerful Shared Repeater system.

The microprocessor-controlled model TP-154 provides everything necessary to convert any receiver and transmitter into a powerful high performance private or shared repeater system. The TP-154 is the only panel in the industry capable of handling 154 subscribers simultaneously

The CS-900 is a deluxe micro processor-based fully automatic VOX Simplex Base Station interconnect. It can be operated simplex or through any conventional repeater and many trunked repeaters.

The CD-2 quickly and accurately decodes and displays 51 CTCSS Codes, 112 DCS Codes, 16 DTMF Digits

WP-639: is a 4-cavity BpBr Circuit® duplexer designed for use with duplex systems operating at 600 KHz or more frequency separation in the 144-174 MHz band.

WP-420-1: VHF bandpass cavity, 118-144 MHz. Ideal for use in large metropolitan areas

WP-678: Consists of four 4" OD cavities interconnected with double shielded coaxia cable in a bandpass-reject configuration.

Model 37 Max	High-Capacity Community Repeater Panel	\$360.00
Model 38 Max	Advanced Repeater Panel	\$720.00
Model 38A	Microprocessor Based Repeater Panel	\$630.00

Model 38A: is a microprocessor-based repeater tone panel that can be remote-programmed to eliminate time-consuming trips to remote repeater sites. To improve sensitivity, the Model 38A contains ToneLock, a special decoding circuit that holds onto a radio's subaudible tone even when receiver quieting drops as low as 1 to 3 dB SINAD.

Model 37 Max: is a community repeater panel that provides for a high number of users (50 CTCSS, 104 DCS) at the lowest possible cost. All programming is performed using DTMF over the radio channel. Include cross-tone encoding, reverse-tone mode, transmit time-out, ToneLock high-performance decoding and squelch-tail elimination.

Model 38 Max: is an advanced repeater panel that is capable of handling 50 CTCSS tones and 110 DCS codes simultaneously. Its ability to accommodate up to 160 user groups makes it ideal for scan-based trunking applications, for use in regions that experience extensive interference, and other applications requiring numerous tones/codes.
